Tire Pressure
Don't bleed air from hot tires because the pressurer is higher than normal. Pressure will drop as much as six pounds, when tires cool. Check tire inflation (including the spare tire) at least once a month when tires are cool. Carry your own tire air gauge because many of the automatic "air tower" gauges are off as much as six pounds.
Underinflation - not enough air pressure inside -- is the worst enemy of tires with spare tire) at least once a by 4 to 12 pounds, can cut tire life by 10 to 40 percent.
Replace missing tire valve caps. They keep out water, dirt and sand, protecting the valve core seal from damage and air leaks.

IN MEMORIAM

In Loving memory of my Daddy, Aurelious A. Baldwin who passed away sixteen years ago April 12, 1947.
God saw the road was getting rough.
The hills were hard to climb;
He gently closed his loving eyes and whispered "Peace be Thine."
What is home without a Father,
All things this world may send
But when I lost my father,
I lost my dearest friend.
To those who have a father,
Treat him with care,
You'll never know his value,
Until you see his vacant chair.
Sadly missed by Daughter. 4-12-1p
